Por years a noted Ohio Doctor, Dr.
F. M. Edwards, successfully relieved scores of patients from constitution with his famous Dr. Edwards' Olice Tablets—now sold by druggists from coast to coast.

TIRES LAST LONGER

this winter

Repair cuts and bruises promptly

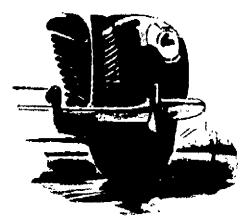

A break in the tire will let water seep in and rot the fabric. If this happens, tire is unfit for recapping.

Keep valve caps on all tires

Caps are especially important in winter, to prevent water eating away valve cores, seeping in and rotting tube.

Be more cautious on icy winter streets

More tire injuries occur in winter because of skidding and "chuck holes" that cut and bruise the casing.

Recap in time Biggest tire-savers of all: -no ration

-inflate to 32 pounds

-switch tires regularly to equalize wear

Anyone can get a passenger tire recapped. The important thing is to recap before the carcase is "too far gone."

NORMAN THOMAS, announcing his intention to stay out of the field of presidential candidates in 1944, names Maynard Krueger of Chicago university as his successor. Without knowing how these things work among the Socialists, we doubt if Mr. Krueger is a succorner worth mentioning.

He cannot rally the 884,781 votes Mr. Thomas received in 1932, when it looked as though things might be coming his way at last, nor a fair share of the more than a million disaffected votes that fell to Mr. Thomas and Lemke, the leading minority candidates in 1936; Mr. Thomas' there was 187,720. We doubt if Mr. Krueger can get even the 99,557 votes cast for Mr. Thomas in 1940, his worst showing. NOW IS THE TIME

Now is the time for all wise men to come to the ald of their water pipes.

Winter's fury may be just around the corner. Burst water pipes mean inconvenience to you, due to lock of running water, and costly repair bills.

In these days of shortages, both manpower and critical materials, neglect of water pipe protection against cold weather is unpatriotic.

Here's what to do:

- Wrep exposed water pipes and meter with old newspapers, rags or burlap.
 - Make your basement air tight. Repair broken window panes. Stuff cracks in walls, around windows and around doors which admit cold air.

A warm basement conserves heating fuel and protects. your pipes and plumbing against freezing, which is important now. Material to repair burst water pipes and plumbers to do the work are extremely difficult to obtain in these days of material and manpower shortages.
